Trans. of Teploenergetika (USSR) 1960 [v. 7] no. 5,
p. 81-88.

A comparison is made of the experimental data ob-
tained by various investigators on the critical density
of heat fluxes during the boiling of water in tubes.
Results of tests are given which establish the effect
of the elastic properties of the medium contained in
the preceding volumes and of the size of these vol-
umes, upon the occurrence of local boiling in steam-
ing tubes. (Author)
